The Hampton Inn at LaGuardia Airport was one of 4 hotel projects in which Gotham served as contractor for our longtime client, Field Hotel Associates, a prominent developer and operator of franchise-affiliated hotels in the Northeast. The new 123,000 sf, 11-story hotel features 200 guest rooms, 2 parking facilities, meeting rooms, a restaurant, amenity spaces in the cellar and on the 1st floor, and perimeter landscaping. The building is a poured-in-place reinforced concrete foundation with a precast concrete superstructure composed of wall panels and concrete plank floors. The main lobby entrance features a barrel vault glass ceiling and finely appointed stone finishes.
